PROFESSIONAL SUMMARY

Fullstack Developer with 3+ years of experience building ERP, accounting, and payment systems for the logistics, distribution, and fintech industries (Laravel, Node.js, Vue/Nuxt, React). Experienced in financial modules (general ledger, bank reconciliation, settlement) and payment gateway integrations (Midtrans, Espay, QRIS/VA), including signature validation, callback handling, and retry mechanisms. Delivers systems end-to-end, from database design to deployment, with finance and operations teams. Freelance since 2019.

WORK EXPERIENCE

Software Engineer

Feb 2025 – Present

PT Dapur Perangkat Lunak Indonesia (Koffiesoft), Surabaya

- Built a web-based ERP accounting system for PT Mitra Distribusi Utama (FastAPI, Nuxt 3): journal, bank statement, bank reconciliation, and general ledger modules, used by 20–35 accounting users.
- Developed a PPOB platform (Miharogames Store) integrated with Midtrans and Espay payment gateways: real-time payments, automatic refunds, 2FA, white-label support, and an admin dashboard for general consumers.
- Built an ERP Web Order system for PT Central Surya Baru, a building materials distributor (React.js, Next.js): real-time data sync and a sales referral system, used by 10–30 sales staff.
- Delivered 3 client projects in parallel under tight deadlines: requirement analysis, frontend and backend development, and full testing before release.

IT Staff – Web Development

2023 – Jan 2025

PT Lintas Samudera Jaya, Surabaya

- Built and maintained the company's logistics ERP from scratch (Laravel) with 10+ modules: Waybill (STT), Finance, Accounts Receivable, Attendance, SLA, and Marketing Visits; used by 20–60 users across HR, finance, marketing, operations, and 3 main branches.
- Automated HR, management, and marketing reports: reduced HR report preparation time from about 7 hours to about 5 minutes.
- Worked with finance, operations, and marketing teams on period-end closing and financial projection modules to improve financial data accuracy.
- Developed features and improvements requested by each department, with unit, automated, and manual testing before release.

Graphic Designer & UI/UX Designer

Apr 2022 – Mar 2023

PT Lintas Transindo Jaya (same group as PT Lintas Samudera Jaya)

- Created brand assets, promotional materials, and website designs for a freight company (Figma, Photoshop).

Founder & Freelance UI/UX Designer / Developer

Sep 2019 – Mar 2023

Gradestudio.id (own freelance studio)

- Founded and ran a freelance studio with 5+ clients: UI/UX design (Figma, User-Centered Design), functional prototypes in Flutter (Android) and CodeIgniter (web), and technical documentation (BRD, UML, ERD, user flow).

FREELANCE PROJECT

Payment System Engineer

Dec 2025 – Mar 2026

Payment Channel System – Pondok Pesantren Dalwa

- Built an end-to-end VA/QRIS payment channel (Laravel 11, Vue 3, Inertia.js): transaction initiation, callbacks, and real-time status updates.
- Implemented signature validation, error handling, and retry mechanisms to keep payments reliable at hundreds of daily transactions.

EDUCATION

Bachelor of Information Systems, Universitas Tanjungpura, Pontianak

Graduated 2023

GPA 3.36/4.00 | Accreditation A | Technology Business Incubator tenant (2020)
